IbraDev

FULL-STACK DEVELOPER — REACT · DJANGO · AUTOMATION

PROFILE

Full-stack developer based in Algiers, specializing in building modern, performant web applications with React and Tailwind CSS, backed by robust Django and Python APIs. Passionate about automation — turning repetitive tasks into efficient, intelligent, automated systems that scale.

FOCUS AREAS

01

Modern Web Development

Fast, responsive apps built with React.js and Tailwind CSS — pixel-perfect and production-ready.

02

Django Backends & APIs

Secure, scalable REST APIs with Django REST Framework, JWT auth, Redis caching and Celery tasks.

03

Advanced Database Design

Relational (PostgreSQL/MySQL) and graph databases (Neo4j) for complex data models.

04

AI & Automation Systems

Python scripts and workflow orchestration that turn repetitive tasks into intelligent pipelines.
